

# HEAVY DUTY MINI FLUSHPLATE

## Mini-Flushplate \*With Heavy Duty Air Motor\*

The Mini-Flushplate, with its multiple interchangeable abrasive heads, is one of the most versatile tool systems available today. Employing the 3M Roto Peen hub, the Mini-Flushplate performs like a hand-held controlled shot blast machine capable of achieving SSPC SP11 cleanliness and is NAVSEA approved. The hammer hub performs like a high speed needlegun. The cutter hub is the most aggressive and is capable of removing non-skid and even scarifying concrete.

The right-angle heavy duty motor provides more power for the most demanding jobs. A bonus of the right angle motor is that it is more compact in width when compared to the standard motor.

### Rotary Scarifiers

Desco's Mini-Flushplate and FX Flushplate systems were designed as an innovative solution for applications previously requiring multiple tools. The Desco Flushplate enables the operator to make up a number of tools by simply changing out the abrasive hub. Whether removing rust and corrosion, heavy coatings or providing a mechanical shot blast profile, the Desco Flushplate Systems are capable of tackling all these applications with a simple head change. Desco Flushplate Systems also include engineering controls that enable safe use in the most hazardous environments, including lead abatement and even radioactive decontamination.

### Specifications

Weight.....	9.0 lbs
Speed.....	4,500 rpm
Power.....	85 psi @ 39 cfm
Cleanin Swath.....	2.25 inches*
Productivity.....	25 to 150 sq.ft. per hour

\*Cleans to within 3/4" of a vertical surface

Walk-Behind Scarifiers

Hand-Held Scarifiers

Needleguns

Impact Tools

Sanders and Abrasives
