

# HAND HELD MIXER

## HAND HELD "QUICK-MIX" MIXER

Air-driven mixers feature cast aluminum piston grip to comfortably fit your hand. Used to mix small batches of thin or heavy liquids, including non-skid. The air control valve allows you to easily adjust speed. Low speed mixing and stalling in heavy liquids will not cause overheating, as with an electric motor. Stainless steel multi-blade cage impeller will not damage container and is ideal for rapid, thorough mixing of paints, adhesives, dry wall compounds, etc.
